CPD Support Package

Showcasing 10 unique sessions that flow timely across the day and across timezones, the Global Land and Property Conference will feature speakers from diverse backgrounds and regions whilst highlighting the influence and lifecycle of RICS' global standards and how they truly shape the land and property sectors internationally. Throughout the event we will provide a deep dive into three key areas of interest:

Hear from RICS specialists on the latest standards and practices around decarbonisation including an overview of the Whole Life Carbon Assessment within a global context, insights into the new Carbon Information Paper alongside an update into the challenges of decarbonisation within a market and economic context.

Understand the key challenges in developing and maintaining affordable housing from both a land and property perspective; we will cover the challenges of procuring land, land supply and relevant professional standards alongside land management for carbon offsetting and the valuation of land and property within an affordable housing context.

Investigate recent case studies in resilience to understand the lack of investment and infrastructure challenges around water access issues, alongside a look into carbon offsetting, energy usage and updates in ESG. You will have an opportunity to hear from experts from the land and property sectors on topics around flooding,

Speaker(s): Kevin Brogan FRICS, National Director, Group Risk & Compliance, Herron Todd White

An introduction from RICS

Our standards documents lay out the ethical, conduct and competence related standards for the profession. By working to our standards, professional members and RICS regulated firms deliver confidence and transparency. Join us for an update on our priorities for the land and property sectors.

Market & economic update: Understanding the challenges of decarbonisation

Join us for a look at the predictions both short-term and long-term in how decarbonisation goals and application will affect the economy of the global land and property sector.

Speaker(s): Simon Rubinsohn, Chief Economist, RICS

Panel: A look at the global housing market

Join a panel of experts for a global look at housing in the current market, and how that feeds into the goal of decarbonisation. We will hear from sector leaders on their perspective on carbon offsetting, climate change and what needs to be done to ensure a sustainable housing market.

Speaker(s):

Georgia Warren-Myers, Head of ESG and Risk APAC, JLL

Flora Harley, Head of ESG Research, Knight Frank

Comfort Break

Land for affordable housing

We will take a look into the role of land in achieving adequate and affordable housing globally. Additionally, we will cover how we can improve governance and management of land markets in urban and peri-urban markets where demand outweighs supply.

This session will look into other factors around the need for spatial planning and a range of land tenure and property rights options to reflect diverse and changing forms of housing demand.

Whole Life Carbon Assessment in a global context

Whole Life Carbon Assessment is key to achieving global sustainability. With an estimated 40% of carbon emissions originating from the construction sector, the standard sets out an RICS approved technical methodology for assessing the carbon impact from buildings and related infrastructure assets throughout their lifecycle. We will hear from those already implementing the WLCA for a look at the standard in practice.

Case studies in resilience

Resilience relates to our ability to recover, and often includes elements of versatility, permanence and strength but moreover the purpose is to drive recovery and continued action.

We will look at the innovative projects currently leading the way in resilience including:

- Carbon offsetting in largescale projects
- Energy usage and ESG.
- Achieving climate resilience.
